

Introducing the Tri-Action Facial Rejuvenation System

Your Personal At-Home Beauty Expert !

The Limits of Topical Skincare

The Absorption Barrier: Nature's Defense

The stratum corneum, our skin's outermost layer, is a formidable barrier designed to keep substances out. Studies show up to 90% of topical serums and creams never penetrate deep enough to address root causes.

Persistent Visible Concerns

Dullness & Aging:

Uneven tone, lackluster radiance, fine lines, and sagging skin that resists surface creams.

Hyperpigmentation & Acne:

Stubborn dark spots, post-acne marks, and persistent blemishes that remain despite daily care.

The Need for a Deeper Solution

Traditional surface-level care is no longer enough. We need a way to bypass the barrier, unlock product potential, and resolve multiple skin issues at their source.

Tri-Action Facial Skin Care Device

The **Tri-Action** Facial Rejuvenation System is a comprehensive facial rejuvenation system that combines three powerful, clinically-proven technologies into one sleek, easy-to-use device, bringing professional skincare into your home.

EP Technology

The "professional-grade serum booster" that enhances the absorption of skincare actives deep into the dermis for maximum efficacy.

3MHz Sonic Vibration

A deep-cleaning and lifting massager that removes impurities, boosts circulation, and firms skin for a youthful contour.

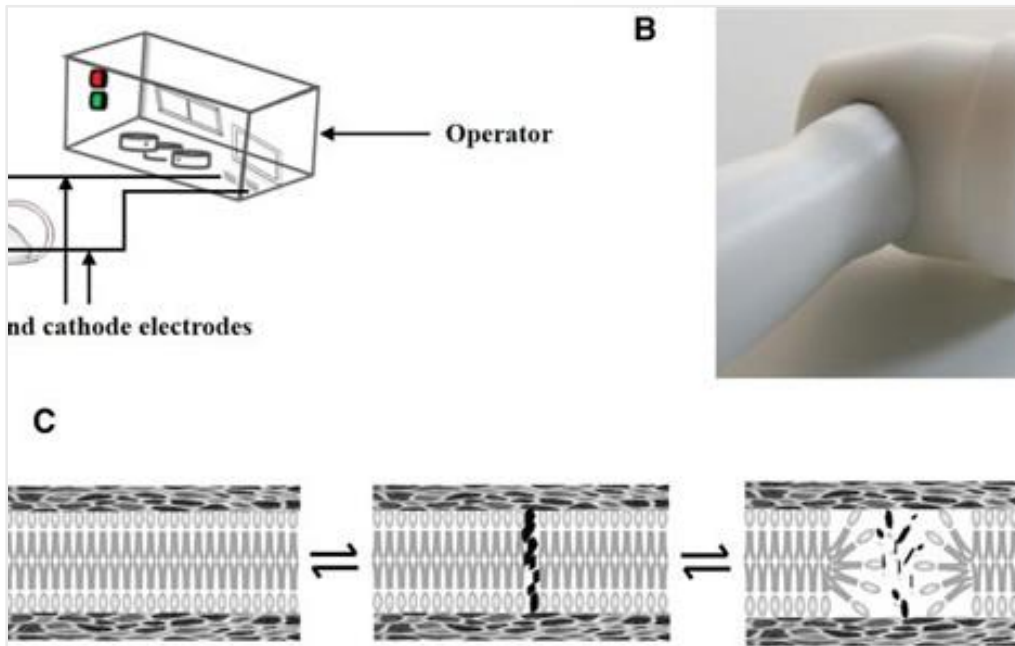

4-Color LED Therapy

A multi-target skin corrector using red, blue, green, and yellow light to address acne, redness, dullness, and aging.

"Achieve Salon-Quality Results in the comfort of your own home."

Technology 1: Electroporation (EP) Technology

The diagram illustrates how controlled electrical pulses temporarily disrupt the cell membrane, forming nano-channels for enhanced molecular delivery.

⚡ Unlock Your Skin's Potential

High-frequency 22KHz pulses create temporary nano-channels, allowing large molecules like hyaluronic acid to bypass the skin's natural barrier.

🔧 The "No-Needle Mesotherapy" Effect

Achieve results comparable to injectables without pain or risk. The optimized frequency preserves cell integrity while creating transient pores for absorption.

🏗️ Key Benefit: Hyper-Absorption

Clinical studies confirm skincare actives absorption increases by up to **10-20 times** compared to manual topical application.

Technology 2: 3MHz Sonic Vibration

This handheld device delivers precise sonic waves directly to the skin's surface, ensuring targeted care for a glowing, revitalized complexion.

Our device harnesses high-frequency sound waves at **3 million cycles per second (3MHz)**. These waves generate gentle, deep-seated heat and a micro-massage effect that penetrates beyond the skin's surface for comprehensive rejuvenation.

Thermal Effect (Warmth)

Increases blood circulation, boosts metabolism, and stimulates fibroblasts to produce more collagen and elastin for plump, youthful skin.

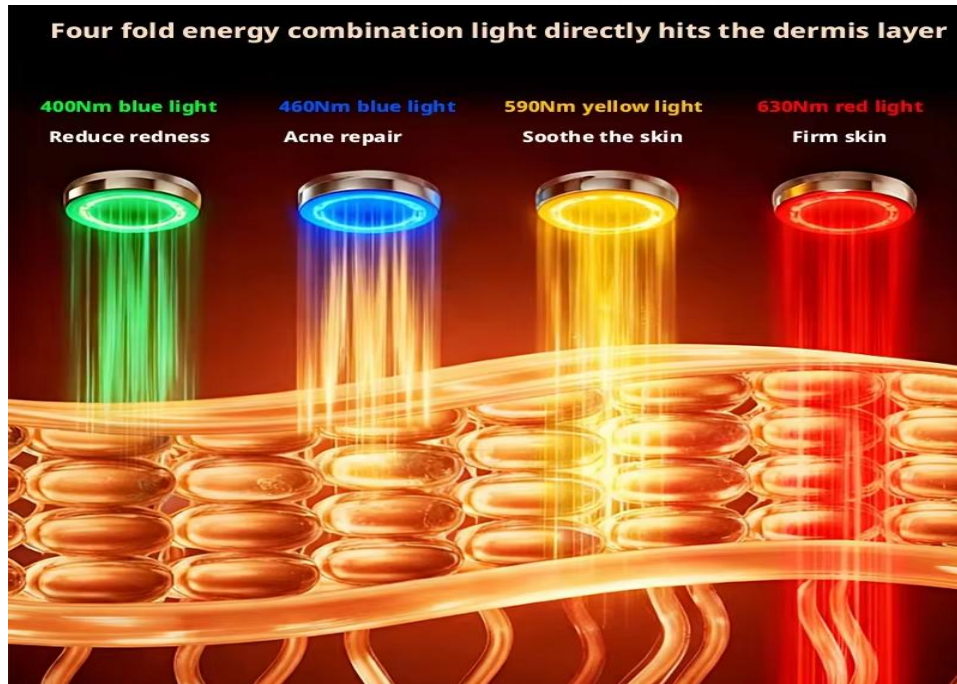

Mechanical Effect (Micro-Massage)

Loosens dirt and oil from pores, enhances lymphatic drainage to reduce puffiness, and provides a soothing, lifting massage effect.

Key Benefits: Experience a trifecta of skincare success: Deep Pore Cleansing, Improved Blood Circulation, and visible Skin Lifting & Firming.

Technology 3: 4-Color LED Photon Therapy

LED photon therapy leverages precise wavelengths of light energy to activate natural biological healing processes in the skin. This non-invasive, painless treatment addresses a spectrum of skincare needs, from anti-aging to acne control, by stimulating cellular renewal and balance.

Red Light (630nm)

Targets anti-aging and rejuvenation by stimulating collagen production, reducing fine lines, and improving overall skin texture for a youthful glow.

Yellow Light (590nm)

Enhances brightening and soothing. Fades dark spots, calms sensitive or inflamed skin, and boosts circulation for an even, radiant tone.

Blue Light (460nm)

Powerful acne-fighting agent that kills P. acnes bacteria at the source, regulates excess sebum production, and clears active breakouts effectively.

Green Light (400nm)

Focuses on soothing and balancing. Reduces hyperpigmentation, minimizes redness from rosacea, and evens out skin discoloration for harmony.

Benefit 1: Ultimate Serum Infusion

1. Apply Serum

Start with a clean canvas: apply your preferred serum directly to your skin to prepare for deep infusion.

2. Activate EP Mode

22KHz electrical pulses create temporary, harmless channels in the skin's surface to unlock absorption pathways.

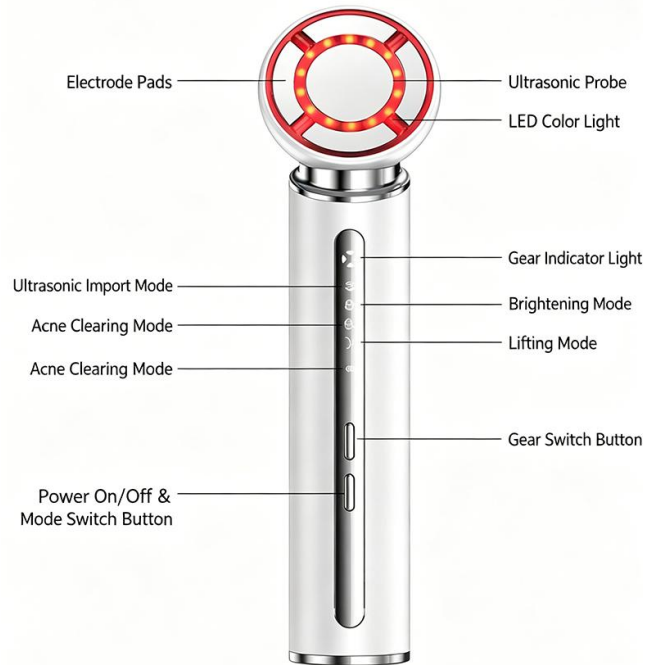

3. Sonic Vibration Massage

Gentle sonic vibrations massage active ingredients deep into the dermis, ensuring no nutrient goes to waste.

THE RESULT: MAXIMIZED ROI

Your premium skincare products are delivered precisely to where they matter most, significantly boosting their effectiveness and ensuring you get the full value from every drop.

Your 5-Minute Daily Routine

Intuitive device controls for effortless operation. Adjust modes with a simple press to suit your needs.

01. Cleanse

Start with a clean, dry face to ensure the device works effectively and allows skincare products to absorb optimally into the skin.

02. Apply Serum

Apply your favorite water-based serum or moisturizer to create a smooth, conductive base that enhances absorption and efficacy.

05. Finish Up

Lock in all the benefits with a layer of your regular moisturizer. During the day, always follow up with broad-spectrum sunscreen.

03. Select Your Target Mode

Tailor your session: Red for Lifting, Yellow for Brightening, Blue for Acne Treatment, or EP Mode for deep Serum Infusion. Each paired with gentle vibration for best results.

04. Glide & Massage

Move the device gently in slow, upward and outward motions across your face and neck for 5-10 minutes. The ergonomic design ensures comfortable, easy gliding.

Technical Specifications

Core Technologies

Electroporation, 3MHz Sonic Vibration, and 4-Color LED Photon Therapy for comprehensive skin care efficacy.

Product Dimension & Weight

Size: 34*172*45mm

Net Weight (Device Only): 150 g

Gift Box Size: 206 * 103 * 58 mm

Color: White

Electrical Parameters

Working Voltage: 3.7 V

Rated Power: 4 W

Built-in Battery Capacity: 1000 mAh

Full Charging Time: 2 Hours

Suggested Usage: 30 minutes per session, twice a week

Four Working Modes (Combination Technology)

1, Infusion Mode (Essence Import)

Ultrasound + EP Electroporation + Red Light,

2, Brightening Mode

EP Electroporation + Vibration + Yellow Light

3, Acne Clearing Mode

EP Electroporation + Vibration + Blue Light

4, Lifting & Tightening Mode

EP Electroporation + Vibration + Green Light

LED Light Wavelengths

Red (630nm), **Yellow** (590nm), **Blue** (460nm), and **Green** (400nm) wavelengths target diverse skin concerns.

Probe & Electrode Configuration

Probe Material: Medical Grade 316 Stainless Steel

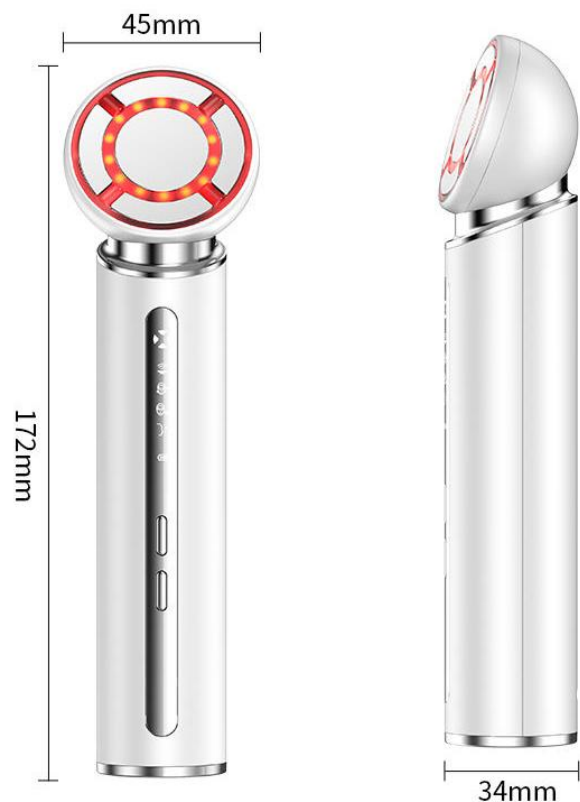

Electrode Design: 4-Pole EP Electrode Array

EP Electroporation Frequency: 22 KHz

Ultrasonic Frequency: 3 MHz

Vibration Speed: 10,000 rotations per minute

Why Choose the Tri-Action System?

An all-in-one skincare device designed to simplify your routine and elevate your results.

A Complete System

Addresses multiple skin concerns—from fine lines to dullness—with just one versatile device.

Maximized Efficacy

Enhances product absorption to ensure your serums and creams work harder for visible, lasting benefits.

Pro-Grade Results

Bring the transformative power of professional salon treatments directly to the comfort of your home.

Smart, Safe & Efficient

Non-invasive, painless, and time-saving. Skip costly salon trips while caring for all skin types safely.

2026

Thanks!

Looking forward to cooperating with you!
