Modern High-Speed Hair Dryer

Redefining Hair Care Experience

110,000 RPM BRUSHLESS MOTOR • IONIC MOISTURE LOCK • 70dB WHISPER QUIET

01. A New Era of Hair Styling

Introducing our state-of-the-art High-Speed Hair Dryer, a revolutionary fusion of cutting-edge aerodynamic technology and ergonomic design. It redefines professional and home hair care by delivering ultra-fast drying performance while actively protecting hair health with intelligent thermal control.

Ultra-Fast

110,000 RPM brushless motor cuts styling time by 50% for efficient, time-saving drying.

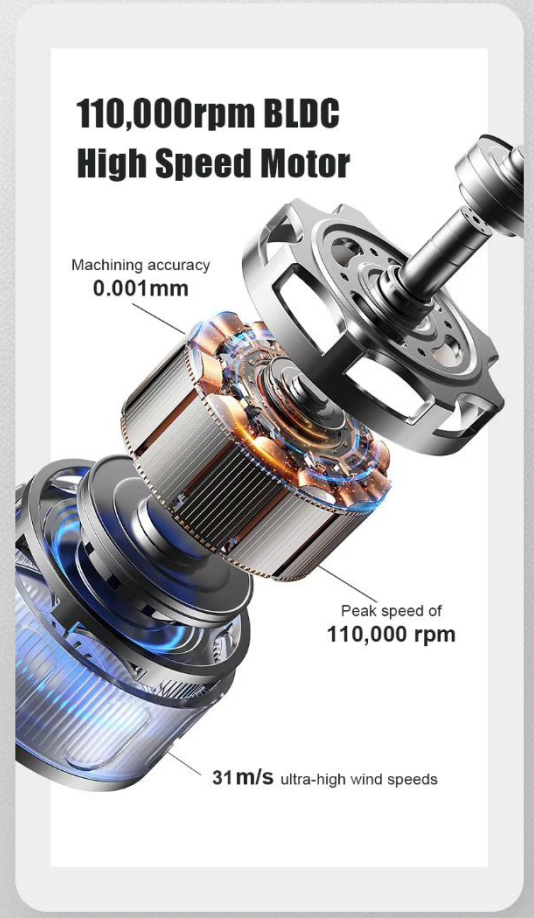

Smart Temp

Intelligent sensors prevent overheating, maintaining a constant optimal temperature for hair health.

Ionic Care

Million of negative ions seal cuticles, reducing frizz and static for silky, salon-quality shine.

02. Unparalleled Performance: The Heart of Power

At the core of our dryer lies a high-performance Brushless DC (BLDC) motor, engineered to deliver extreme speed and efficiency—redefining what a hair dryer can do with every use.

110,000 RPM Ultra-High-Speed BLDC Motor

Propels airflow to an astounding**31 m/s**, cutting drying time by half while preserving hair integrity with lower heat.

Aerodynamic Precision Design

A**convergent air duct**paired with**470 micro air intake vents**ensures maximum airflow efficiency and minimal turbulence.

Optimized Power for Global Standards

1600W (EU) / 1400W (US) power rating delivers consistent, salon-level performance across all voltages and hair types.

03. Unparalleled Performance: 5x Faster Drying

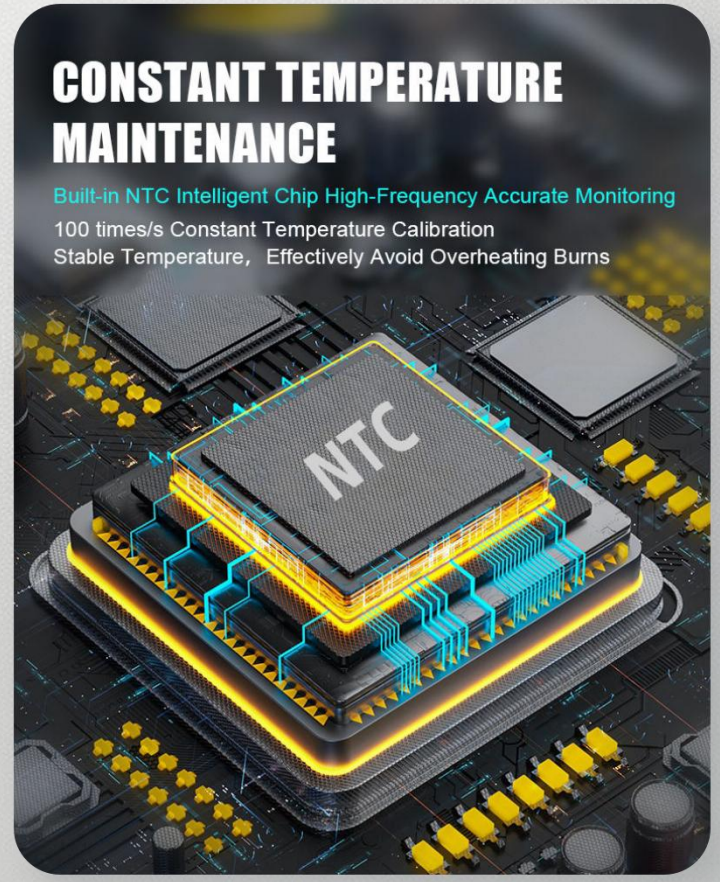

Our cutting-edge brushless motor technology achieves**5 times faster drying**than conventional hair dryers. This breakthrough efficiency drastically reduces styling time, letting you step out with salon-worthy results in a fraction of the usual time.

Short Hair	Medium Hair	Long Hair
1 min	3 mins	5 mins
Quick morning touch-ups	Effortless everyday style	Full volume & shine

"Less time styling, more time living. Our high-speed dryer turns getting ready into a breeze."

04. Intelligent Temperature Control: Protecting Your Hair

Heat is the primary cause of hair damage. Our dryer integrates an intelligent temperature control system to deliver a gentle yet powerful drying experience, protecting your hair from overheating and preserving its natural moisture balance.

NTC Smart Chip

Monitors and calibrates temperature**100 times/sec**, eliminating sudden heat spikes and ensuring precision control for every strand.

Thermal Protection

Maintains a stable airflow temperature to avoid overheating burns, locking in your hair's natural shine and preventing long-term damage.

"Engineered to dry fast without compromising hair health—intelligence that cares for your hair."

05. Intelligent Temperature Control: Customized Settings

The intuitive touch control panel delivers precision from**35°C to 90°C**, with**13 adjustable settings**in 5°C increments. This level of customization ensures you can tailor the heat to your unique hair type and styling goals.

01. Natural Wind (35°C)

Ultra-gentle cool airflow for sensitive scalps or locking in your final style with a smooth, frizz-free finish.

02. Warm Air (50°C)

Mild, nurturing heat ideal for fine, fragile, or color-treated hair to minimize dryness and protect delicate strands.

03. Hot Air (90°C)

Maximum drying power for thick, coarse, or curly hair, drastically cutting down styling time.

04. Hot & Cold Cycle

Alternating hot and cold blasts to seal cuticles, enhancing shine, body, and long-lasting hold.

06. Advanced Ionic Technology: Silky, Smooth Hair

Transform your daily hair care with our integrated ionic generator. It doesn’ t just dry hair—it reconditions it, banishing frizz and static for a salon-perfect finish every time.

19 Billion Negative Ions / Second

Microscopic ions break down water droplets for lightning-fast drying, reducing heat exposure and preserving your hair’ s natural strength and vitality.

Frizz Reduction & Luminous Shine

Neutralizes static electricity and smooths the hair cuticle, eliminating flyaways and revealing a brilliant, mirror-like shine that lasts all day.

Healthier, Hydrated Hair

Seals in natural moisture to prevent dryness and brittleness, leaving your hair feeling softer, smoother, and more manageable with every blow-dry.

07. Thoughtful Design: User Experience Reimagined

Lightweight & Ergonomic

Weighing only**410 grams**, this ultra-light build minimizes arm fatigue, making long styling sessions effortless and comfortable.

Dual-Core Digital Display

An intuitive HD screen delivers instant, crystal-clear feedback on temperature and airflow speed, putting you in complete control.

Magnetic Concentrator Nozzle

Secure magnetic attachment enables one-handed, tool-free installation for precise, salon-like styling with zero hassle.

Anti-Hair Intake Filter

A precision-engineered filter traps loose hair and lint, ensuring consistent airflow, peak performance, and easy maintenance.

08. Versatile for All Hair Types & Family Use

For Adults: Tailored to Every Texture

Customizable heat and speed settings deliver precise styling for thick, curly, fine, or straight hair, ensuring salon-perfect results at home.

For Children: Safe & Comforting

Gentle 35°C–50°C temperature control and ultra-quiet operation create a calm, tear-free drying experience for kids.

For Salons: Power & Productivity

Professional-grade airflow drastically reduces drying time, boosting service efficiency and client throughput without compromising quality.

09. Technical Specifications

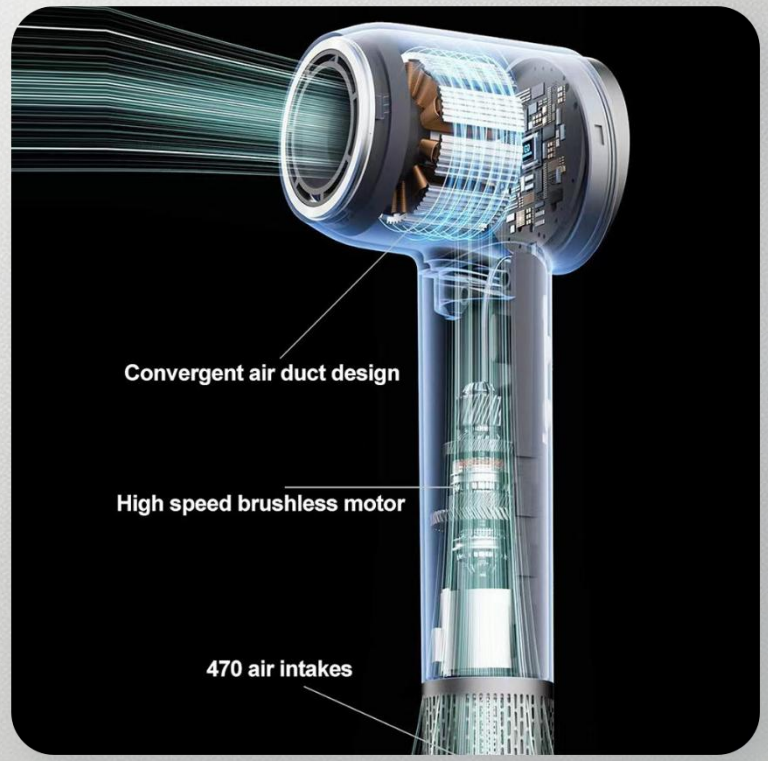

EU Version (220V - 240V)

- **Power & Motor:**1500-1600W | 110,000 rpm High-Speed BLDC Motor
- **Performance:**31 m/s Max Airspeed | 35°C-90°C Range (100x/sec Calibration)
- **Physical Specs:**254x70.5x95mm | 410g | 2.0m Power Cord | <70dB Noise
- **In The Box:**19 Billion Negative Ions Tech | Styling Nozzle | Magnetic Flip-Top Gift Box (860g)

US Version (110V - 120V)

- **Power & Motor:**1300-1400W | 110,000 rpm High-Speed BLDC Motor
- **Performance:**31 m/s Max Airspeed | 35°C-90°C Range (100x/sec Calibration)
- **Physical Specs:**254x70.5x95mm | 410g | 2.0m Power Cord | <70dB Noise
- **In The Box:**19 Billion Negative Ions Tech | Styling Nozzle | Magnetic Flip-Top Gift Box (860g)

10. Core Data Summary

The combination of precision- engineered air duct and high- speed brushless motor delivers outstanding drying efficiency and quiet operating experience.

Motor Speed
110,000 rpm

Temperature Settings
13 Levels

Max Airspeed
31 m/s

Temp Calibration
100 Hz

Negative Ion Output
19 Billion

Dryer Weight
410g

Temperature Range
35°C - 90°C

Noise Level
< 70 dB
